

**WISA**® Electronic control panels

# WISA Tronic

Hygienic non-touch flushing technology

## A feast for the eyes

With Eos panels by WISA you get state of the art control panels for your house. An adornment for every toilet or bathroom. Comfortable and hygienic flushing by modern electronics. When you approach the toilet, the panel comes to life, and 2 indicators light

up slowly. When you move your hand in front of the panel, technology takes over, and the toilet is flushed automatically. Beautiful on the outside, clever on the inside.

## Models

**Plastic**

**Glass**

**Steel Design**

**Steel Vandalisimo**

## Attractive and functional in every environment

A well-designed control panel gives each washroom something extra. The Eos control panels by WISA not only meet many functional requirements, but also give your toilet or bathroom a special appearance. WISA Tronic panels, manufactured from high performance plastics, glass or stainless steel, can be used in private homes, but are also ideally suited for semi-public buildings such as offices and hotels. Especially for public buildings we offer the Eos Vandalisimo. A robust but elegant control panel in 6 mm thick stainless steel.

### Eos glass black

Subtle design and perfection in technology make this special panel an ornament on the wall. The sophisticated design of this glass panel in combination with LED lighting in a color of your choice, gives every washroom a special look. Modern, luxurious, comfortable and hygienic characterize this particular panel.

Material: glass

Colour: black or white

Dimensions: 16x16 cm.

Article number black: 8050419638

Article number white: 8050419821

## Innovative technology

Those who think lightly about flushing technology might be wrong. Behind the very beautiful shaped panel, modern technique is hidden. Whether it is about changing the color of the lighting, or setting the periodic flushing, a number of functions are easy to set up from your mobile phone or tablet.

No permanent power supply available?

No problem! The hydro generator generates sustainable energy after each flush. The combination of design, optimum hygiene, functionality and maximum ease of use in your washroom.

### Eos Steel Design

Design and technology come together in the Eos Steel. Behind the sturdy but elegant cover plate of brushed stainless steel hides an ingenious mechanism. Without touching the panel, the dual flush flushing mechanism is activated. A special, timeless design for the modern bathroom.

Material: stainless steel

Colour: natural

Dimensions: 16x16 cm.

Article number: 8050419640

### Eos plastic white

This panel, made of high quality plastic, is characterized by its subtle design. Glossy white with a black screen where two luminous indicators show the large- and small flush. Behind the front the electronics ensure that the flushing mechanism is put into operation. A modern control panel that provides infra-red technology, comfort and hygiene.

Material: glass

Colour: white

Dimensions: 16x16 cm.

Article number: 8050419811

## Easy does it

WISA Tronic is very easy to install and fits in every WISA XS cistern. Also when the system is already installed and is provided with mechanical or pneumatic control (retro-fit). Pull out the standard mechanism with a simple movement, and replace with the electronic mechanism which has a powerful servo motor. The control panel with electronics is connected to the servo motor which operates the flush valve.

### EOS vandalisimo

Especially for all public places with high frequency of use, the Vandalisimo provides the ideal solution for operating a concealed cistern. The robust stainless steel front panel is 6 mm thick. The stainless steel gives sufficient strength with certainty. The technology behind this panel ensures optimum hygiene and durability.

Material: stainless steel

Colour: natural

Dimensions: 23x16 cm.

Art Dual Flush: 8050419650

Article number Single Flush: 8050419655

## App

With a special WISA application for your mobile phone or tablet, you can easily change the settings of the control panel. You can for instance change the color of the LED lights on the control panel, and adjust the setting of the interval flushing adjust and set the interval flush.

For more information, visit our website.

## Power

The WISA Tronic control panels are powered by mains, voltage (230V transformer - 6V European plug). The length of the cable is 170 cm. If no mains are available you can choose either the hydro generator or battery power.

## Battery power

In previously installed XS flushing systems where mains are not available, battery operation can be selected. In that case the intelligent electronics automatically switch to Eco Mode, and thus saving energy. This guarantees with fully charged batteries a standby period of 1 year, or 1,500 flushes. (Article number 8050883140)

# Generate electrical energy from hydropower.

## Hydro generator

Generate electrical energy from hydropower. with this hydro-electric generator, you never have to worry about enough energy. the generator is connected between water supply and float valve. This ingenious hydro-electric powerplant generates energy with every flushing of the toilet and stores it in a special Lithium Ion battery. This battery is placed in the waterproof battery compartment. (Article number 8050883136)

# WISA Arnhem

WISA develops, produces and sells sanitary products since 1865. From our headquarters and production facility in the Netherlands, we are engaged in sanitary ware on a daily basis. And that already for one and a half centuries. Grown big in flushing technology, we nowadays offer a complete range of products, such as flushing systems and accessories, ceramics, toilet seats and a wellness program.

WISA offers a 25-year guarantee on the supply of spare parts.

## Features WISA Tronic

- Can be installed in every XS flushing system
- Flushing by non-touch infrared technology
- Mains 230 V (standard)
- Hydro generator or 6V battery pack (optional)
- Design panels in plastic, glass or stainless steel
- Dual Flush (3 / 6L or 2.5 / 4L)
- single Flush (EOS Vandalisimo)
- RGB LED lights (every color possible)
- WISA Intelligent Sensor Technology (WIST)
- Walk-away automatic flushing
- Hygienic flush for optimal water quality
- Eco Mode for power saving
- Change the settings by WISA App.
