WISA all-in-one

Why do things the hard way?

WISA presents all-in-one. One package for a complete installation of toilet, washbasin or cloak room basin.

From ceramics to sanitary kit. From insulation set to socket screw. And supplied with a step-by-step manual.

WISA all-in-one is available in 8 different versions.

Two for the installation of a built-in system with wall hung toilet bowl. And three versions containing a wall hung toilet bowl, wash basin or cloakroom basin. The two versions containing a floor mounted toilet pan with exposed cistern and the close coupled cistern complete these series of WISA all-in-one.

Each all-in-one box is supplied with an elaborate instruction manual. So installing is just as easy as getting the all-in-one box. All steps of installation are clearly shown with instructional pictures and the manual contains several checkpoints for the right installation. Very easy.
