

WISA Arnhem

At WISA we design, develop, manufacture and sell sanitary products since 1865. From our head office and factory in The Netherlands we have been engaged in sanitary ware for almost a century and a half. Growing over the years in flushing technology, we nowadays offer a complete assortment of toilet systems, vitreous china, toilet seats, plumbing accessories and Wellness products.

Warranty and Certificates

With WISA XT you choose for a secure installation. So without hesitation we offer you a full 10 year guarantee.

The WISA organisation is ISO certified. This quality mark emphasises complete control over production and the continuous process of improvement.

WISA takes its responsibility a step further and offers a 25 year guarantee on the supply of spare parts.

All WISA XT toilet systems pass the 400 KG test without any problem.

WISA XT concealed cisterns are certified by all major Dutch and international Certification Institutes.

For information on our other products please check our catalogue or website www.wisa-sanitair.com

XT toilet systems

WISA XT toilet systems

WISA presents a new line of toilet systems called the WISA XT. The XT systems are only 38 cm wide, and allow either mechanical or pneumatic operation. The XT systems are available in three different heights: 83cm, 98cm and 112cm. On the 83cm and 98cm systems you can choose between top or front control. The 83cm version is ideal in situations where you have limited space, for instance under a bathroom window. When installing the top control panel it allows to open the toilet seat without covering the control panel.

WISA XT 112 cm
art.nr. 8050453004

Well-designed on the outside, and smart on the inside.

During development of the XT system WISA was assisted by an elaborate team of installers. The practical experience of these professionals show that aspects like easy installation, reliability, failure costs, but also efficient processing and aesthetics play an important role. This knowledge, combined with Wisa's many years of experience in developing flushing systems was the basis of this new line of XT toilet systems.

The 83cm and 98cm systems allow both front or top control

The XT systems are standard equipped with mechanical operation.

Easy change to pneumatic operation is possible on all XT systems.

Because of the XT 83cm frame being so compact it allows easy installation, for instance under a window or behind your bath tub.

Like the XT 83cm frame, the 98cm frame is also very compact. The height of 98cm allows to open the lid of the toilet seat without covering the control panel.

When installing the toilet bowl at 40cm the WISA XT 112cm frame is ideal when tiling with standard 30cm tiles.

Control panels

WISA XT control panels are available in two versions: The mechanical panels, characteristic by its rectangular design, and the pneumatic panels with their round push buttons. The control panels can be used in front or top operation, and are available in ABS plastic in white, with a shiny or matt chrome finish. Or with a stainless steel cover.

The XT toilet systems are equipped with a PE discharge elbow (90mm) and a PE eccentric adaptor (90x110mm). Optional: For difficult to reach sewage pipes use the flexible WISA Flexifon Built-In.

Very compact frame. Only 38 cm wide and 14 cm deep.

Click and break along the fold line. No tools needed.

The discharge elbow can be adjusted left or right.

A quick change from mechanical operation to pneumatic operation is possible by exchanging the outlet valve lifting mechanism.

The pre-installed wall fixation guarantees quick and easy installation of the WISA XT.

The flange in the flush pipe prevents the rubber seal to move during installation of the toilet.

With the yellow parts like the masonry aid or pipe covers your installation is protected against construction debris.

With one click the flushing volume can be changed from 6 to 7,5 litres, and back. This can be done without even having to remove the valve.

The fully insulated reservoir prevents condensation of water.

All WISA XT toilet systems come with a standard sound insulation set.

Including drilling template

universal hydraulic float valve fills the tank in no time and at a very low noise level.

The height of installation can very easily be checked with the meter-level stickers. Adjustable height of the frame for comfort installation up to 20 cm.

A quick change from mechanical operation to pneumatic operation is possible by exchanging the outlet valve lifting mechanism.

WISA XT concealed cisterns are supplied with a pre-installed water connection. There is ample room for the installation work.

The WISA XT83 cm and the XT98 cm allow front control operation as well as top control operation on the same cistern.
